QUESTION 1

The following statement about the region is correct (Select 3 Answers)?

- A. APs belonging to the same region will uniformly adjust the RF channel and power.
- B. An AP can belong to two regions at the same time, so that roaming is more optimized.
- C. If you do not configure, all APs belong to region 0 by default.
- D. AP region is laid in three types: dense placement, discrete deployment, and normal deployment.

Correct Answer: ACD

QUESTION 2

In an 802.11 frame, the terminal needs to obtain access rights to the wireless medium, and what kind of control message is to be sent?

- A. RTS
- B. CTS
- C. ACK
- D. PS-Poll

Correct Answer: A

QUESTION 3

A point-to-point wireless bridge can be used to connect two networks that are located at different locations. In a wireless backbone connection, the Root AP and the Leaf AP should be set to different channels.

- A. True
- B. False

Correct Answer: B

QUESTION 4

The following is a description of the classification and function of Huawei AP. The following statement is correct (Select 3 Answers).

- A. AP6010SN and AP6010DN are indoor-mounted APs
- B. AP6310SN is an indoor distributed AP

C. AP6510DN and AP6610DN are outdoor APs

D. AP6610DN is a Gigabit fiber interface, so it cannot be directly connected to the AC6605.

Correct Answer: ABC

QUESTION 5

Wireless NICs that only support TKIP can be upgraded via drivers to support AES encryption.

A. True

B. False

Correct Answer: B

QUESTION 6

According to the following configuration example, the following statement is correct. [AC] dhcp enable [AC] interface VLANif100 [AC-VLANif100] ip address 10.1.100.1 24 [AC-VLANif100] dhcp select interface [AC-VLANif100] quit

A. The DHCP service is enabled by default in the global mode, so the dhcp enable can be configured.

B. dhcp select interface command enables the DHCP client function on the interface of VLAN 100.

C. If VLAN 100 is a user VLAN, the gateway is 10.1.100.1 and the mask is 255.255.255.0 after the user receives the address.

D. If VLAN 100 is the management VLAN where the AP is located, the option 43 field in the DHCP message received by the AP should be 10.1.100.1.

Correct Answer: C

QUESTION 7

What are the upgrade modes of Huawei Wireless AP (Select 2 Answers)?

A. AC Download

B. FTP Server Download

C. AP Comes with

D. BAS Download

Correct Answer: AB

QUESTION 8

The AC6605 supports three ways to establish AP and AC interworking. What are the options (Select 3 Answers)?

- A. Offline increase AP
- B. Automatically discover AP and go online normally
- C. Automatically discover the AP and confirm the online
- D. Find the AP through multicast and automatically go online

Correct Answer: ABC

QUESTION 9

In the TKIP encryption mode, the length of the IV vector is bit.

- A. 12
- B. 24
- C. 48
- D. 64

Correct Answer: C

QUESTION 10

AAA is a management framework that is implemented using more common protocols.

- A. RADIUS
- B. CAPWAP
- C. 802.11a/b/g/n
- D. 802.1X

Correct Answer: A

QUESTION 11

Huawei's AP products can only support one SSID.

- A. True
- B. False

Correct Answer: B

QUESTION 12

In the 802.11 frame, what is the value of To DS and From DS when the wireless station sends a signal to the wireless AP?

- A. 0,0
- B. 0,1
- C. 1,0
- D. 1,1

Correct Answer: C

QUESTION 13

If a wireless client is connected to the same SSID of two APs, then what determines which wireless AP the wireless terminal is connected to?

- A. SSID
- B. ESSID
- C. BSSID
- D. BSA

Correct Answer: C

QUESTION 14

In the PoE terminology, the PSU is called the Power Supply Unit, which refers to the power supply unit, such as the Ethernet interface of the PoE switch.

- A. True
- B. False

Correct Answer: B

QUESTION 15

Regarding the networking method, the following description is correct.

- A. Compared with the three-layer networking, the second-tier networking is more suitable for large networks such as parks and stadiums.
- B. The advantage of the three-layer networking is that the configuration is simple and the networking is easy.
- C. If the AC's ability to process data is weak, it is recommended to use a side-by-side networking.

D. In the direct connection network, the service data of the AP can directly reach the uplink network without going through the AC.

Correct Answer: C
