QUESTION 1

To run the first line which lsscsi command export at the linux which computer only connect FC storage as follows:

(0:0:0:0) disk VMware, VMware Virtual S 1.0 /dev/sda

(1:0:0:0) disk Huawei, S2600

(1:0:0:1) disk Huawei, S2600

(1:0:0:2) disk Huawei, S2600

(2:0:1:0) disk Huawei, S2600 /dev/sdb

(2:0:1:1) disk Huawei, S2600 /dev/sdc

(2:0:1:2)

disk Huawei, S2600 /dev/sdd Known 0:0:0:0 is the only local disk for this machine Which of the following are true?
(Select 3 Answers)

A.

at least have 2 pieces of FC HBA card in this server

B.

this server connect to storage array use the multipath

C.

six LUN assigned to this server

D.

three LUN assigned to this server

Correct Answer: ABD

QUESTION 2

Which of the following statements of virtual snapshot of storage array is correct?

A. the snapshot LUN is virtual LUN

B. snapshot rollback once cannot be used again

C. the snapshot is effective after creation

D. snapshot support across the array

Correct Answer: A

QUESTION 3

Which of the following opinions of HostAgent scheme is wrong?

- A. suggest separately prepare server to install HyperManager server
- B. InbandAgent can only be installed on the business host
- C. ConsistentAgent can only be installed on the business host
- D. HyperManager client end can only be installed on the Windows host

Correct Answer: B

QUESTION 4

Which of the following statements of remote replication functions of array is correct?

- A. copy divided into synchronous replication and remote replication
- B. copy divided into asynchronous replication and remote replication
- C. copy divided in to inside this array replication and remote replication
- D. copy divided into synchronous replication and asynchronous replication

Correct Answer: C

QUESTION 5

A set of S5500 write policy set to write-back, after a controller lapsed, LUN's write strategies will translate into through.

- A. True
- B. False

Correct Answer: A

QUESTION 6

IP SAN network, what are the common faults?(Select 3 Answers)

- A. IP can't be connected
- B. port restriction
- C. VLAN Set is not reasonable
- D. FC port lack of light power

Correct Answer: ABC

QUESTION 7

What are the main functions of UltraPath multipath software? (Select 3 Answers)

- A. if there is no multipath software, it will not be able to configure the cluster
- B. failover
- C. the load balancing
- D. failback

Correct Answer: BCD

QUESTION 8

Remote copy link between array according to transport protocol is divided into which several? (Select three Answers)

- A. parallel link
- B. cross link
- C. FC link
- D. iSCSI link

Correct Answer: CD

QUESTION 9

SAS domain is composed of SAS Expander and SAS terminal equipment, and connect through the SAS bus.

- A. True
- B. False

Correct Answer: A

QUESTION 10

In read SCSI, the process of interaction of initiator and target is less than the writing process of interaction of initiator and target. Mainly in the process of writing, need to distributed cache.

- A. True
- B. False

Correct Answer: A

QUESTION 11

UltraPath multipath software supports multiple network connection mode, and the most simple way of connecting method is directly connected network.

- A. True
- B. False

Correct Answer: A

QUESTION 12

Which of the following statement about the IO load characteristics is wrong?

- A. IOPS continuously increase with the increase of data blocks
- B. the bandwidth value increases with the increase of data blocks, finally the trend of increase gradually slow, until leveled off
- C. IO order is stronger, the performance is better
- D. the queue depth, the load pressure on storage is greater

Correct Answer: A

QUESTION 13

About storage network management software, which description is wrong?

- A. equipment management can manage storage array device
- B. business management, business flow management
- C. topology display, visual display device of the current topology connection status
- D. DHA service management, hard disk health data/performance data

Correct Answer: A

QUESTION 14

The LUN copy technology is on the basic of SERVER-FREE.

- A. True
- B. False

Correct Answer: A

QUESTION 15

In the synchronous remote copy of storage array, if copy link break, will lead to the corresponding business interruption in host.

A. True

B. False

Correct Answer: A
