-  **365 Days** Free Update
-  **800,000+** Satisfied Customers

QUESTION 1

In which of the following IKE switching mode can the identity peer consist of the IP address and name be used?

- A. Main mode
- B. Aggressive mode
- C. Fast mode
- D. Passive mode

Correct Answer: C

QUESTION 2

Which of the following are encryption algorithms? (Multiple Choice)

- A. DES
- B. 3DES
- C. SHA-I
- D. MD5

Correct Answer: ABC

QUESTION 3

Which of the following statements is incorrect about backup management software?

- A. Backup management software supports automatic backup.
- B. Backup management software does not support backup for heterogeneous platforms.
- C. Backup management software manages storage media and all backup jobs in a centralized manner.
- D. Backup management software provides a comprehensive log system, enabling administrators to perform monitoring and query operations based on different requirements.

Correct Answer: B

QUESTION 4

Alarm sounds can be set on OperationCenter.

- A. TRUE

B. FALSE

Correct Answer: A

QUESTION 5

Which of the following statements about the INTEL hardware virtualization is incorrect?

- A. VT-x refers to the hardware-assisted virtualization technology of INTEL.
- B. VT-d refers to the I/O assisted virtualization technology.
- C. VT-d refers to the network-assisted virtualization technology.
- D. SR-IOV refers to the VMDq technology.

Correct Answer: D

QUESTION 6

Which of the following statements is correct about the division of responsibilities in a data center service migration project?

- A. During the project implementation, the project implementer is responsible for progress management, risk control quality management, subcontract management, construction management, contract change confirmation, and engineering delivery.
- B. During the project implementation, the customer must provide necessary resources to ensure power supply, refrigerating, lighting, firefighting, equipment room protection, network bandwidth, applying for contract changes, migration personnel arrangement, and so on.
- C. Common responsibilities refer to the work that requires both parties to confirm or to complete together during the project implementation.
- D. During the project implementation, the migration implementer is responsible for confirming the project progress, acceptance criteria, hardware installation environment, and device quantity.

Correct Answer: D

QUESTION 7

Which of the following roles is responsible for initial configuration of Operation Center?

- A. System administrator
- B. Monitoring personnel
- C. Maintenance personnel
- D. Development personnel

Correct Answer: A

QUESTION 8

The x86 server virtualization technology can greatly reduce the server management cost. In the cloud computing environment, which of the following is the ratio between the number of OandM personnel and the number of servers being maintained?

- A. 1:1
- B. 1:10
- C. 1:100
- D. 1:1000

Correct Answer: D

QUESTION 9

Fusion Storage is the distributed storage software that supports storage and computing resource integration. It can be deployed on multiple general x86 servers to combine the local disks on all the servers into a virtual storage resource pool to provide the block storage function.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 10

Which of the following statements is correct about backup network topologies?

- A. In the LAN-Base network topology, backup data and service data are transferred over different networks.
- B. In the LAN-Free network topology, backup data and service data are transferred over different networks.
- C. In the Server-Free network topology, backup data and service data are transferred over the same network.
- D. The Server-Free network topology exerts the greatest impact on the service data among the three network topologies.

Correct Answer: B

QUESTION 11

When a user creates a VM on the FusionSphere OpenStack web client, if the disk space is insufficient, which of the following items should be expanded?

- A. Ceilometer-data
- B. Image
- C. Image-cache
- D. Swift

Correct Answer: B

QUESTION 12

FusionSphere OpenStack management data supports backup to guarantee the system reliability. Which of the following are main backup modes? (Multiple Choice)

- A. Shared storage backup
- B. Use 3-node load balancing deployment mode for ZooKeeper and Paxos to improve reliability. In this way, failures of any node will not affect system functions.
- C. Dual partitions on the local server storage
- D. Automatically back up management data and transfer backup data to the third-party storage device by FTP, S3, or HTTPS.

Correct Answer: BCD

QUESTION 13

ServiceCenter is deployed on a VM created on the host of the management cluster. If ServiceCenter is deployed in active/standby mode, the active and standby VMs are separately deployed on the two hosts of the management cluster.

- A. TRUE
- B. FALSE

Correct Answer: A

QUESTION 14

Which of the following statements about backup types is correct?

- A. A full backup is a complete copy of all the data created at a certain point in time.
- B. An incremental backup is performed based on the changes since the last backup.
- C. A differential backup is performed based on the changes since the last full backup.
- D. Differential backup occupies the smallest storage space among all backup types.

Correct Answer: A

QUESTION 15

FusionCompute consists of CNA and VRM. VRM uses VNA deployed on CNA nodes to manage all virtualization resources.

A. TRUE

B. FALSE

Correct Answer: A
