QUESTION 1

A customer will be using multiple namespaces in their HCP implementation. They want to use a single common protocol to access all namespaces. Which protocol would you enable to support this?

- A. CIFS
- B. WebDAV
- C. STMP
- D. HTTP(S)

Correct Answer: D

QUESTION 2

You are assigning LUNs to a HCP 300. 1 TB drives are being used to create the RAID groups. After allocating the required space for the OS LUN, how much space will be available per data LUN?

- A. 1250 GB
- B. 1666 GB
- C. 2485 GB
- D. 4970 GB

Correct Answer: C

QUESTION 3

You are configuring a HCP 500 solution with AMS 2100 storage. You choose to configure the storage devices first in the list of tasks associated with this process. What is the reason for sequencing the tasks in this way?

- A. The HCP software must first be installed on the AMS 2100 for access.
- B. Formatting the storage containers will take a considerable amount of time.
- C. You must have the data LUNs established before you can install the core OS.
- D. The HCP command LUN must be established on the AMS 2100.

Correct Answer: B

QUESTION 4

What is the required zone configuration of a SAN fabric to support a HCP 500?

- A. one global zone containing all HCP nodes World Wide Port Names (WWPN) of the HBA ports and the storage ports
- B. one zone per HCP node containing two members: World Wide Port Names (WWPN) of the HBA port and the storage port
- C. two mirrored zones; one containing the even numbered World Wide Port Names (WWPN) of the HBA port and the storage port; the other containing odd numbered ports
- D. two zones: one zone containing all HCP nodes World Wide Port Names (WWPN) of the HBA ports and the second zone containing all the storage ports

Correct Answer: B

QUESTION 5

Which three make up a HCP object? (Choose three.)

- A. fixed content data
- B. file share information
- C. encryption information
- D. system policy metadata
- E. custom metadata

Correct Answer: ADE

QUESTION 6

At the system management and search console level, which three actions can be performed by the administrator role? (Choose three.)

- A. View tenant list.
- B. Modify tenants.
- C. Remove a node from the HCP system.
- D. Commit a HCP system upgrade.
- E. Modify network security settings.

Correct Answer: ABE

QUESTION 7

A 4-Node HCP with 40 users is being managed using the single administrator function. Two new users, each from a different department, need to access data in two HCP tenants named: Financials Payable and

Financials Receivable. Which action should the administrator perform to make this happen?

- A. Create two new user accounts with security permissions.
- B. Create default accounts named Financials Payable and Financials Receivable for each user.
- C. Create a data access account for each user.
- D. Create two system administration accounts.

Correct Answer: C

QUESTION 8

Your customer wants a HCP 500 to be configured to provide protection beyond the default level. Which data protection level should be used?

- A. DPL2
- B. DPL1
- C. DPL0
- D. DPL5

Correct Answer: A

QUESTION 9

When installing HCP software nodes, what is the HDS recommended order?

- A. the node with the lowest back-end IP address at the bottom of the rack
- B. the node with the highest back-end IP address at the bottom of the rack
- C. odd back-end IP addressed nodes at the bottom of the rack
- D. even back-end IP addressed nodes at the bottom of the rack

Correct Answer: A

QUESTION 10

A customer has a new HCP 500 with 10 storage nodes and 5 search nodes to be configured using the default configuration. How many LUNs will be cross-mapped if you are asked to configure switch zoning to support Zero Copy Failover?

- A. 15
- B. 20

C. 30

D. 45

Correct Answer: B

QUESTION 11

Which three statements are true about encryption on a HCP? (Choose three.)

- A. Once enabled, encryption cannot be disabled.
- B. The encryption key is accessible through the system management console.
- C. Encryption can only be enabled at the time of installation.
- D. The encryption key must be written down and given to the customer.
- E. The encryption key is displayed several times during the installation process.

Correct Answer: ACD

QUESTION 12

In the event of a replication link failure, what is the default timeout (in minutes) before HCP issues an SNMP broken-link report?

- A. 15
- B. 30
- C. 60
- D. 120

Correct Answer: C

QUESTION 13

A company's finance and legal departments do not share any data and should not be able to

access each other's data; The legal department only accesses data using an application that is integrated with HCP using REST. The finance department requires users to be able to browse data using Windows Explorer. What do you tell the customer?

- A. The finance department should be setup as the default namespace and the legal department should have their own namespace.
- B. The finance and legal departments should use the default namespace.
- C. The finance department should have their own namespace and the legal department should use the default

namespace.

D. The finance and legal departments should use different directories in a single namespace.

Correct Answer: A

QUESTION 14

You have a customer that uses multiple operating systems in their environment: 80% Windows and 20% UNIX. The customer has recently purchased a HCP solution. Which two authentication solutions apply to Windows? (Choose two.)

- A. anonymous access
- B. Active Directory authentication
- C. ability to enable NFS
- D. ability to enable HTTP and WebDAV

Correct Answer: AB

QUESTION 15

With which number must the multicast IP address begin?

- A. 10
- B. 192
- C. 236
- D. 238

Correct Answer: D
