## QUESTION 1

You have to replace a Cache Backup Battery online on a Hitachi Unified Storage system. Which two statements are correct? (Choose two.)

- A. When the power is turned off during the replacement, user data on the cache that has not been written will be backed up to flash memory.
- B. You should not perform any replacement while the green READY LED on the front of the Controller Box is blinking at high speed.
- C. You should only perform the replacement while the green READY LED on the front of the Controller Box is blinking at high speed.
- D. You must complete the replacement within a certain time frame.

Correct Answer: BD

---

## QUESTION 2

A customer has requested your help to find out where a Hitachi Unified Storage (HUS) system's FC port 0A connects into their SAN. How can you find this information?

- A. Use the HUS Web tool to report the switch WWN and port number.
- B. Use Device Manager to determine where the HUS port is connected to.
- C. Use the switch name server to find the HUS WWPN.
- D. Use the SNM2 Advanced Settings to determine the WWPN of the switch port.

Correct Answer: C

---

## QUESTION 3

Which two tasks can be performed online on a Hitachi Unified Storage system? (Choose two.)

- A. replacing a SFP FC Host Connector
- B. removing a Drive Box
- C. upgrading a Flash Memory
- D. replacing a Controller Unit

Correct Answer: AD

---

## QUESTION 4

Which two Program Products reserve cache in a Hitachi Unified Storage system when they are installed, even if disabled? (Choose two.)

- A. TrueCopy
- B. Cache Partitioning Manager
- C. ShadowImage
- D. TrueCopy Extended

Correct Answer: BD

---

**QUESTION 5**

What are the two bitmap locations used by the Memory Management Layer during LU format in Hitachi Unified Storage systems? (Choose two.)

- A. SSD on the Cache Memory Adapter
- B. in the RAID group upon creation
- C. swapped in and out of cache as needed
- D. in Cache Memory Adapter Master Partition 0

Correct Answer: BC

---

**QUESTION 6**

On a Hitachi Unified Storage system, which statement regarding Master Cache Partitions is correct?

- A. They do not exist until the Cache Partition ManagerLicensekey is installed.
- B. There is always a Master Cache Partition 0 in controller 0 and in controller 1.
- C. They always exist if there is 2GB or more of cache memory installed per controller.
- D. They always exist whether or not the Cache Partition ManagerLicensekey is installed.

Correct Answer: D

---

**QUESTION 7**

Which two Hitachi Dynamic Link Manager documents provide detailed information of supported Fibre Channel HBA drivers? (Choose two.)

- A. Hitachi Engineering Change Notice (ECN)
- B. Hitachi Dynamic Link Manager Release Notes

C. Hitachi Dynamic Link Manager Concepts and Planning Guide

D. Hitachi Dynamic Link Manager for Operating Systems User's Guide

Correct Answer: AB

---

**QUESTION 8**

Which three tasks can be performed using the Web tool of a Hitachi Unified Storage system? (Choose three.)

A. collection of a simple trace

B. offline firmware installation

C. identification of failed parts

D. setting up SNMP error reporting

E. configuration of additional cache memory

Correct Answer: ABC

---

**QUESTION 9**

What are two advantages of the Memory Management Layer (MML) in Hitachi Unified Storage systems? (Choose two.)

A. Metadata for MML-supported functions is copied to cache only when needed for processing.

B. LU quick and normal format speeds are increased.

C. The DM-LU size is automatically adjusted depending upon the number of copy pairs.

D. Copy-on-Write Snapshot and TrueCopy Extended Distance no longer require a data pool for differential data.

Correct Answer: AD

---

**QUESTION 10**

A manufacturing company wants to centrally manage all their multipath software using Hitachi Global Link Manager (HGLM). Which two types of multipath software are supported? (Choose two.)

A. HDLM

B. VxDMP

C. PowerPath

D. SDD

Correct Answer: AB

---

## QUESTION 11

Which two resources should be reviewed before installation and maintenance operations? (Choose two.)

- A. HDS Technical White Papers
- B. HDS Maintenance Manuals
- C. HDS Storflash Bulletins
- D. HDS Engineering Change Notices (ECNs)

Correct Answer: BD

---

## QUESTION 12

On which level can Host Group Security be enabled on a Hitachi Unified Storage system?

- A. the FC port level
- B. the Host Group level
- C. the iSCSI port level
- D. the individual LU level

Correct Answer: A

---

## QUESTION 13

What must be installed on an AIX server prior to Hitachi Dynamic Link Manager Installation?

- A. MPXIO
- B. HACMP
- C. HTnM agent
- D. Hitachi ODM

Correct Answer: D

---

## QUESTION 14

What are two characteristics of the Hitachi Unified Storage (HUS) controllers? (Choose two.)

- A. Mixing FC and iSCSI front-end ports is allowed on all models.
- B. The FC front-end ports automatically sense 1, 2, 4 and 8 Gbps.

- C. The FC front-end ports offer improved sequential I/O performance.
- D. HUS models 110 and 130 are active/passive.

Correct Answer: AC

---

## QUESTION 15

A customer wants to migrate Hitachi AMS2300 data to a newly acquired Hitachi Unified Storage (HUS) system. Which statement about the migration is correct?

- A. Modular Volume Migration can be used.
- B. TrueCopy or TrueCopy Extended Distance can be used.
- C. The Data Migration license key is required on both sides.
- D. The Data Migration license key is only required on the HUS.

Correct Answer: B
