- A. ALI is agnostic to the technologies used by the organization and can aggregate information from a heterogeneous environment, including open source tools as well as commercial ones.
- B. ALI provides an integrated Source Control Management. Build Management/Continuous Integration, and IDE.
- C. ALI is an add-on module for HP ALM that aggregates information from multiple ALM tools to establish a complete ALM traceability.
- D. ALI provides out-of-the-box integration to Source Control Management. Build Management/Continuous Integration, and IDE.
- E. ALI can aggregate information from a homogeneous environment based on open source tools 01.
- F. ALI is a technology embedded in HP ALM that aggregates information from multiple ALM tools to establish a complete ALM traceability and to surface actionable information, and help ALM stakeholders in making informed decisions.

Correct Answer: BCF

QUESTION 5

How should you leverage Test Configurations to cover multiple Requirements and avoid duplications?

- A. By associating the same Test Configuration in multiple Tests with each Requirement
- B. By associating different Test Configurations in multiple Tests with each Requirement
- C. By associating different Test Configurations in the same Test with each Requirement
- D. By associating the same Test Configuration in the same Test with each Requirement

Correct Answer: C

QUESTION 6

What happens if a team member with delete privileges tries to delete a representative requirement?

- A. The deletion fails. The representative requirements are read-only and are therefore protected from deletion
- B. The deletion fails. The representative requirement is automatically made read-only, and an alert is optionally triggered
- C. The deletion succeeds. The representative requirement is moved to the Obsolete folder

D. The deletion succeeds. The requirement coverage of the model entity is lost

Correct Answer: D

QUESTION 7

You are the QA manager for a company and are working on a new project in the past, end users have claimed that IT does not deliver what the users ask for. For this release, you decide the end users will sign off on all of the requirements.

Which feature enables the manager of an HP ALM project to define a snapshot of the requirements after users sign them off?

- A. Baseline
- B. Graph Wizard
- C. Document Generator
- D. Traceability Matrix

Correct Answer: A

QUESTION 8

What does the HP ALM Desktop Client Workflow enable users to do? (Select two.)

- A. Graphically visualize and automate the workflow of all modules.
- B. Generate scripts to perform commonly needed customizations on the fields of the Defects module dialog boxes.
- C. Implement long-running processes as workflows within Java applications, using APIs, an in-process workflow engine, and a rehostable designer.
- D. Use Microsoft Visual Studio to customize entities and the appearance of dialog boxes of the Requirements and the Defects modules.
- E. Write scripts to customize fields of dialog boxes in any module and to control the actions that users can perform.

Correct Answer: BC

QUESTION 9

What happens when an HP ALM project administrator saves a customization change as a Major Change rather than a Minor Change?

- A. The customization loads when the session expires and the user reconnects.
- B. The customization loads after the ALM server is restarted.
- C. The customization is added to the parent project template.

D. The customization loads when the user changes screens in ALM.

Correct Answer: A
