- B. Drag objects from the data table or insert from a shared repository.
- C. Change the operation in the Keyword View.
- D. Drag objects from Available Keywords or from the Active Screen.
- E. Use the Step Generator or insert through Keyword View.
- F. Add an operation in the Recording Option Manager.

Correct Answer: ACE

---

**QUESTION 3**

DRAG DROP

Click the Task button. Place the methods for identifying an object in the order in which QTP would attempt to use them. Assume they are all defined/enabled.

Place the methods for identifying an object in the order in which QTP would attempt to use them. Assume they are all defined/enabled.

Methods in Order		Methods
1	(place method here)	Ordinal Identifier
2	(place method here)	Visual Relation Identifiers
3	(place method here)	Description Properties
4	(place method here)	Smart Identification

Done

Select and Place:

Place the methods for identifying an object in the order in which QTP would attempt to use them. Assume they are all defined/enabled.

Methods in Order		Methods
1	(place method here)	Ordinal Identifier
2	(place method here)	Visual Relation Identifiers
3	(place method here)	Description Properties
4	(place method here)	Smart Identification

Done

Correct Answer:

Place the methods for identifying an object in the order in which QTP would attempt to use them. Assume they are all defined/enabled.

Methods in Order		Methods
1	Description Properties	
2	Visual Relation Identifiers	
3	Smart Identification	
4	Ordinal Identifier	

Done

## QUESTION 4

What happens when you import data using the DataTable.ImportSheet function?

- A. Data is overwritten when column headers in Excel and the data table match.
- B. Sheet1 in the Excel file is always imported.
- C. Data will be appended to the data table.
- D. A new column is added to the data table when column headers in Excel and the data table match.

Correct Answer: A

## QUESTION 5

Before automating a test, you decide to create a library of actions to be reused to achieve testing goals.

Which elements are critical for recording the different combinations of actions?

- A. starting and ending parameters
- B. input and output conditions
- C. initial and end conditions
- D. visual and implied cues

Correct Answer: C

---

## QUESTION 6

What are expected values in HP QuickTest Professional?

- A. the values recorded during a test run and compared with original values within test objects
- B. the values contained in the "expected results" property of each test object
- C. the values predefined as the expected results of an unsuccessful test run
- D. the values captured during recording and used in checkpoints as reference values

Correct Answer: D

---
