-  **800,000+** Satisfied Customers

QUESTION 1

Which benefit of the REST API when compared to other well-known interface methods should be presented to a customer to correctly position HPE OneView?

- A. REST API offers integrated JavaScript Object Notation (JSON) translation
- B. No state change message bus is needed to communication with HPE OneView
- C. REST API has lighter bandwidth requirements
- D. The code is compatible with all Simple Object Access Protocol (SOAP) scripts

Correct Answer: C

QUESTION 2

You are planning an HPE StoreVirtual architecture based on a customer's physical site configuration. The customer has two physical sites and wants to span the cluster between them and requires that all sites should be peers.

What should be done to meet this customer's requirements?

- A. Configure a Failover Manager in each physical site.
- B. Configure the cluster to span both sites, and configure one site as primary site.
- C. Create an additional logical site at each physical site with a Failover Manager.
- D. Create a logical third site to provide a Failover Manager.

Correct Answer: B

QUESTION 3

You are demonstrating management of HPE 3PAR StoreServ arrays using HPE OneView. When you attempt to add an array, you cannot attach to it. What must you do to resolve this problem?

- A. Reboot the HPE 3PAR StoreServ nodes, one at a time.
- B. Restart the RESTful Application Program Interface (REST API).
- C. Reboot the HPE OneView appliance.
- D. Restart the Web Services Application Program Interface (WSAPI).

Correct Answer: D

QUESTION 4

A customer has a multi-site environment and plans to consolidate file-and-block-level data. A proof of concept is arranged to familiarize the customer with HPE 3PAR StoreServ File Persona functionality.

Which statement is true when failing over file-level data between the arrays?

- A. The Peer Persistence Arbitrator must register the file shares before a failover is initiated.
- B. An automated failback is initiated once the primary storage system comes back online.
- C. The clients must reconnect to NAS shares once failover is complete.
- D. A second cluster IP must be configured as a DNS alias for the file shares running on the HPE 3PAR StoreServ.

Correct Answer: D

QUESTION 5

Your customer is concerned about downtime during storage system upgrades.

Which method of technology addresses this concern when using an HPE 3PAR StoreServ solution?

- A. Persistent Peers
- B. Persistent Cache
- C. Persistent Ports
- D. Persistent RAID

Correct Answer: C

QUESTION 6

A customer purchased an HPE 3PAR all-flash array to accelerate the company's databases. The customer is concerned about the risk of data loss. Synchronous replication is currently being used, but it is causing slow I/O due to limited network bandwidth and latency, both of which cause application slowdown.

Which alternative solution should you propose to address the issue?

- A. Asynchronous Streaming Remote Copy
- B. Synchronous Long Distance Remote Copy
- C. Periodic Asynchronous Remote Copy
- D. Peer Persistence

Correct Answer: C

QUESTION 7

With regard to converged infrastructure, how does the HPE Converged Storage strategy view a customer's IT infrastructure? (Select two.)

- A. Workloads and applications are abstracted from the infrastructure.
- B. Customer's IT infrastructure is seen as an end-to-end process.
- C. Software-defined storage and proprietary APIs are leveraged
- D. Converged Storage IT infrastructure components are seen as entirely virtual
- E. Control of the data center becomes entirely automated by hardware and software

Correct Answer: AE

QUESTION 8

When designing an HPE StoreOnce POC with Catalyst using Symantec NetBackup, you need to know which products require licenses.

Match each product to its licensing requirements

Select and Place:

		Licensing Requirements	Product
<input type="checkbox"/> License needed	<input type="checkbox"/> No license needed	<input type="text"/>	HPE StoreOnce Catalyst
		<input type="text"/>	NetBackup OST Plugin
		<input type="text"/>	Symantec Netbackup OST Support
		<input type="text"/>	Symantec NetBackup Deduplication

Correct Answer:

		Licensing Requirements	Product
License needed	No license needed	No license needed	HPE StoreOnce Catalyst
		License needed	NetBackup OST Plugin
		License needed	Symantec Netbackup OST Support
		License needed	Symantec NetBackup Deduplication

QUESTION 9

A customer has almost reached the maximum number of domain IDs in a B-series, Fibre Channel SAN fabric. The company has also recently acquired another company and needs to integrate their C-series Fibre Channel SAN to be able to share the SAN infrastructure.

Which feature should you enable on the C-series, Fibre Channel edge switches to meet these requirements?

- A. NPV mode
- B. FSPF routing
- C. hard zoning
- D. soft zoning

Correct Answer: C

QUESTION 10

You need to quickly determine if a software upgrade is available for an HPE 3PAR StoreServ system. Where can you locate this information?

- A. HPE 3PAR Firmware Update Notification Utility (FUNU)
- B. HPE 3PAR Integrated Management Console (IMC)
- C. HPE 3PAR Service Processor Onsite Customer Care (SPOCC)
- D. HPE 3PAR StoreServ Management Console (SSMC)

Correct Answer: C
