QUESTION 1

In which state of the Peer Motion unidirectional workflow does the host access the volumes on the source storage system through the destination storage system?

- A. Import
- B. Admit
- C. Dismiss
- D. Admitvv

Correct Answer: C

QUESTION 2

What is the benefit of using HPE 3PAR StoreServ and HPE Recovery Manager Central with HPE StoreOnce? (Select two.)

- A. Each backup completes at the speed of a differential backup and restores as a traditional full restore.
- B. The HPE Recovery Manager Central agent in each host provides self-service data protection.
- C. They provide rapid and non-disruptive online recovery.
- D. Each backup is deduplicated in the 3PAR array prior to a restore, for an application-consistent restore result.
- E. Each backup can be restored via a synthetic full image.

Correct Answer: AB

QUESTION 3

Which parameters can be set with Priority Optimization? (Select three.)

- A. Min Limit
- B. Max Limit
- C. Min Goal
- D. Latency Goal
- E. Max Latency
- F. Max Goal

Correct Answer: BCE

QUESTION 4

In the RMC-V and 3PAR Snapshot Recovery Set (VM consistency) creation process, what is required inside the VM to prepare for a snapshot?

- A. VSS service started inside the VM
- B. Catalyst Host Agent install
- C. VM Tools installed inside the VM
- D. 3PAR Host Explorer Agent

Correct Answer: B

QUESTION 5

What is different between the 3PAR Peer Persistence solution and the VMware SRM solution using 3PAR storage SRM adapter integration? (Select two.)

- A. dual cluster configuration
- B. disaster avoidance
- C. disaster recovery
- D. manually triggered storage failover
- E. high availability

Correct Answer: BC

QUESTION 6

What is a mandatory configuration when using Fibre Channel on VMware ESXi hosts with HPE RMC?

- A. Disable iSCSI support on ESXi hosts.
- B. Enable iSCSI support on ESXi hosts.
- C. Configure virtual FC after relevant patches are applied to the ESXi hosts.
- D. Configure VMDirectPath I/O on both HBA ports.

Correct Answer: A

QUESTION 7

What does HPE 3PAR Azure Site Recovery with SAN Replication do? (Select two.)

- A. allows the administrator to use Recovery Manager Central to perform manual push-button recovery
- B. allows the administrator to pre-program the disaster response
- C. provides a push-button disaster failover and recovery from Microsoft Azure administrative console using SnapDiff technology
- D. integrates Azure Site Recovery with both synchronous and asynchronous HPE 3PAR Remote Copy
- E. provides Catalyst over Fibre Channel disaster recovery using Microsoft Azure console

Correct Answer: BC

QUESTION 8

In the Oracle database environment, how can 3PAR Priority Optimization help to improve the application?

- A. Setting the IOPS increases the throughput of data per second, thus decreasing the completion time of databases queries.
- B. Setting the response time or latency improves transaction times in the database.
- C. Setting the bandwidth controls the IOPS, thus only applying to OLTP workloads.
- D. Setting the bandwidth reduces the wait time of the storage responding to the server request.

Correct Answer: A

QUESTION 9

Which type of data migration requires that all virtual volumes are migrated concurrently, and that the host must be unzoned from the source storage system before the migration begins?

- A. Host-Level Online Migration
- B. Offline Migration
- C. Minimally disruptive Migration
- D. Single-Volume Online Migration

Correct Answer: B

QUESTION 10

Which software component complements HPE RMC for added customer value with the integration with HPE RMC for VMware (RMC-V) and is a tool that extends the functionality of a backup and replication feature (by allowing the administrator to view and recover an application item from within the application VM backup or replica)?

- A. Veeam Explorer
- B. HPE 3PAR Host Explorer
- C. HPE RMC Catalyst Host Agent
- D. Oracle RMAN

Correct Answer: A
