- ⚙️ **365 Days** Free Update
- ⚙️ **800,000+** Satisfied Customers

## QUESTION 1

Universal Containers is using the enterprise WSDL to integrate their financial system to salesforce, while reading y=the release notes for the upcoming salesforce release the architect discovers a new object will be added to the salesforce data model that would be beneficial for the financial system integration.

What two actions should the architect take to ensure the new object will be available to the financial system integration?  
Choose 2 answers

- A. Download the latest enterprise WSDL that contains the new object definition to generate Web service stubs for the new Salesforce object.
- B. Download the latest partner WSDL that contains the new object definition to generate web services stubs for the new salesforce object
- C. Migrate to the partner WSDL to generate a generic sObject service stub that can be leveraged for existing and future Salesforce objects
- D. Migrate to the metadata API to download the new salesforce sObject definition into the financial system integration.

Correct Answer: AD

---

## QUESTION 2

What are two benefits of canvas that an Integration Architect should consider when exposing external systems from within Salesforce?

Choose 2 Answers

- A. Canvas can provide authorization information via the signed Request.
- B. The canvas SDK can be used to make an external systems UI look like Salesforce.
- C. Canvas can send data to an external system asynchronously.
- D. Canvas endpoint URLs can be dynamically changed via a Lifecycle Handler.

Correct Answer: AD

---

## QUESTION 3

What are the three capabilities of the Bulk API?

Choose 3 answers

- A. process multiple batch jobs asynchronously
- B. Process multiple batch jobs synchronously
- C. Roll back all transactions within a batch of 10000 records

- D. Monitor job status via the API.
- E. Monitor job status via the Web UI.

Correct Answer: ADE

---

## QUESTION 4

Universal Containers (UC) wants to connect their on-premise ERP system to view Order data in Salesforce. UC is considering a solution to integrate the on-premise system using Salesforce Connect via OData.

Which three considerations should an Architect keep in mind when recommending use of Salesforce Connect?

- A. Customer wants the ability to query external data using Global Search and reports.
- B. Customer does not want real-time access to the ERP data and is willing to wait for hourly refreshes.
- C. Customer wants to create a master-detail relationship between Opportunity and the external object.
- D. Customer needs to query small amounts of data at any time and display using a related list.
- E. Customer has a large amount of data that they do not want to load into Salesforce.

Correct Answer: ADE

---

## QUESTION 5

Northern Trail Outfitters (NTO) has recently implemented middleware for orchestration of services across platforms. The ERP system being used requires transactions be captured near real time at a REST endpoint initiated in Salesforce when creating an order object. Additionally, the Salesforce team has limited development resources and requires a low code solution.

Which two options will fulfill the use case requirements? Choose 2 answers

- A. Use Remote Process Invocation fire and forget pattern on insert on the order object using Flow Builder.
- B. Implement a Workflow Rule with Outbound Messaging to send SOAP messages to the designated endpoint.
- C. Implement Change Data Capture on the order object and leverage the replay Id in the middleware solution.
- D. Use a process builder to create a Platform Event, selecting the record type as the Platform Event Name on insert of record.

Correct Answer: AC

---

## QUESTION 6

Universal Containers is replacing a home-grown CRM system. Currently, a .Net application runs a batch process to query the CRM system nightly and create a CSV file that is picked up via SFTP and loaded to a SQL database.

What technology should an architect use to minimize custom development when replacing the CRM system with

Salesforce?

- A. Outbound messaging
- B. APEX Batch
- C. APEX Callout
- D. Middleware

Correct Answer: D

---

## QUESTION 7

Universal Containers has two integrations to Salesforce; System A requires read-only access to all Opportunity data while System B requires read-write access to all Accounts.

Which approach ensures compliance with the principal of least privilege?

- A. Utilize a single "Integration User" with the "Modify All data" profile setting enabled so that all integrations always have access to all data.
- B. Utilize separate credentials and profiles for each integration, one having "view All" to ties and the other having "Modify All" to Accounts.
- C. Use a single "Integration User" with profile settings restricted to "view All" for opportunity and "Modify All" for Accounts.
- D. Utilize separate credentials for each system with both credentials having the "modify all data" permission on the profile.

Correct Answer: C

---

## QUESTION 8

Universal Containers has decided that they will be using the bulk API to migrate the existing data into Salesforce as they will be importing a total of 80 million records.

While planning for the data migration, what techniques should the Architect recommend to make sure the load go according to schedule?

Choose 2 answers

- A. Pre-process data that the triggers and workflows can be deactivated.
- B. Perform a test load using a full Sandbox prior to the Production load.
- C. Perform loads over a weekend server resource availability.
- D. Leverage several workstations, loading different objects simultaneously.

Correct Answer: AB

---

## QUESTION 9

A company needs to be able to send data from Salesforce to a home grown system behind a corporate firewall. The data needs to be pushed only one way and doesn't need to be sent in real time. The average volume is 2 million records per day.

What should an integration architect consider when choosing the right option in building the integration between the external system and Salesforce?

- A. Due to high volume of records, number of concurrent requests can hit the limit for the REST API call to external system.
- B. Due to high volume of records, a third party integration tool is required to stage records off platform.
- C. Due to high volume of records, the external system will need to use a BULK API Rest endpoint to connect to salesforce.
- D. Due to high volume of records, salesforce will need to make a REST API call to external system.

Correct Answer: B

---

## QUESTION 10

Universal containers would like to restrict access to Salesforce to only clients on their network

Which two mechanisms should an Integration Architect utilize to prevent unauthorized clients?

Choose 2 answers

- A. Configure Login IP Ranges on any profiles used by Integration
- B. Use a login flow to validate the IP and request a 2nd factor if incorrect
- C. Use a trigger to change the user's profile if their IP is not trusted.
- D. Enable the "Lock sessions to the IP address from which they originated" setting.

Correct Answer: AB

---

## QUESTION 11

Universal Containers (UC) stores inventory of products in one Salesforce org. UC wants regional and local branch offices who have their own Salesforce orgs to see the latest information about the product.

What is the recommended approach to provide data access?

- A. Use Heroku Connect to provide access to products as external objects from other orgs.
- B. Use Salesforce Connect with oData to provide access to products as external objects.
- C. Use Apex HTTP Callouts to call Salesforce Rest APIs and provide access restrictions within the Apex class.

D. Use Cross-Org adapter for Salesforce Connect to provide access to products as external objects.

Correct Answer: D

---

## QUESTION 12

An Architect is asked to build a solution that allows a service to access Salesforce through the API. What is the first thing the Architect should do?

- A. Create a new user with System Administrator profile.
- B. Authenticate the integration using existing Single Sign-On.
- C. Authenticate the integration using existing Network-BasedSecurity.
- D. Create a special user solely for the integration purposes.

Correct Answer: D

---

## QUESTION 13

Northern Trail Outfitters (NTO) is looking to integrate three external systems that run nightly data enrichment processes in Salesforce. NTO has both of the following security and strict auditing requirements:

1.

The external systems must follow the principle of least privilege, and

2.

The activities of the external systems must be available for audit.

What should an Integration Architect recommend as a solution for these integrations?

- A. A shared integration user for the three external system integrations.
- B. A shared Connected App for the three external system integrations.
- C. A unique integration user for each external system integration.
- D. A Connected App for each external system integration.

Correct Answer: D

---

## QUESTION 14

Universal containers are building an integration between Salesforce and their data warehouse. The architect has the following requirements

- 1. Salesforce users need the ability to CRUD (create,read,update and delete) data from their data warehouse without leaving the Salesforce user interface

2.The integration to the data warehouse should maintain the same look and feel as the existing Salesforce user interface

3.The use of custom development Should be minimized Which two solutions should the architect consider?

Choose two options

- A. Utilize lightning connect with custom ApexAdapter to provide CRUD access to the data warehouse
- B. Utilize a canvas application to render the data warehouse data from within Salesforce
- C. Utilize a visual force page from 3rd party JavaScript library that will provide CRUD capabilities to the data warehouse.
- D. Utilize a 3rd party tool from the App-Exchange that will provide CRUD capabilities between the data warehouse and Salesforce

Correct Answer: AB

---

## QUESTION 15

Universal Containers built an integration using the Bulk API to load records from a legacy system into Salesforce. Parallel option with batch size 1000 was used. However, the batches often fail due to "Max CPU time exceeded" errors which could be resolved with a similar batch size.

What are two risks involved with batch sizes that are too small?

Choose 2 answers A. Possibility of hitting the daily limit for number of batches.

- B. possibility of very long bulk job execution times
- C. Possibility of failures due to record-locking errors.
- D. Possibility of hitting the "Too many concurrent batches" limit.

Correct Answer: BC
