QUESTION 1

The Service Desk of supplier X continuously receives the same incident report. This concerns the latest version of a client-server application. The problem no longer occurs if the former version is re-installed. Because the cause of the incident has still not been traced, the supplier decides to advise the customers to temporarily install the old version, if the problem occurs. What is this advice an example of?

- A. Known Error
- B. Problem
- C. Workaround
- D. Request for Change

Correct Answer: C

QUESTION 2

What can be improved by achieving quality objectives?

- A. Effectiveness of the service
- B. Personal satisfaction of the Configuration Manager
- C. Relationship with interested suppliers
- D. Relationship with unauthorized parties

Correct Answer: A

Correct Answer: A

QUESTION 4

What is a function of processes?

- A. They express the level of compliance with the requested quality characteristics.
- B. They represent a complete set of monitoring options.
- C. They describe vertical and horizontal escalation options.
- D. They complement descriptions of structural and organizational roles and responsibilities

Correct Answer: B

QUESTION 5

Why is it important that the Service Desk attempts to link an Incident to a Known Error?

- A. because this is part of the IT Service Management model
- B. because this means the incident can be resolved more quickly
- C. because this allows incidents to be better tracked
- D. because otherwise Problem Management cannot work

Correct Answer: B

QUESTION 6

What defines Service Quality?

- A. A series of activities that can be assessed in advance by a provider and customer
- B. Achieving a 99.999% continuous level of availability
- C. Meeting stated customer requirements and expectations
- D. Providing a cost-effective service

Correct Answer: C

QUESTION 7

What is a Known Error?

- A. A serious incident whose resolution is known
- B. A Problem that is resolved
- C. A Problem for which the cause and Workaround have been identified
- D. A Problem that cannot be matched

Correct Answer: D

QUESTION 8

Problem Management is responsible for carrying out trend analysis of Incident volumes and types. What is the reason for this?

- A. to be able to charge to the correct users of the service
- B. to be able to provide reports to management
- C. to prevent repetitive occurrence of Incidents
- D. to provide input to the Capacity Database

Correct Answer: C

QUESTION 9

What is the contribution of Availability Management to the Service Level Management process?

- A. Availability Management provides information about the availability of the services being provided.
- B. Availability Management acts in consultation with users to determine the availability of IT services.
- C. Availability Management supplies data about the availability requirements of users.
- D. Availability Management ensures that a Service Level Agreement (SLA) is available for all users.

Correct Answer: A
