QUESTION 1

Given the username XML code, what is the entire string, including the opening and closing tags, called?

A. element node

B. name node

C. text node

D. data node

Correct Answer: A

QUESTION 2

You want to restrict access to the REST API on a Junos device? What are two ways to accomplish this task? (Choose two.)

A. Enable a maximum number of connections

B. Restrict access by the source MAC address

C. Restrict access by the source IP address

D. Enable a schedule of specific access times

Correct Answer: CD

QUESTION 3

You are asked to update a PyEZ script that will check for errors when connecting or loading configurations

on a Junos device.

Which two command statements should be added to the script to accomplish this task? (Choose two.)

A. elseif statement

B. try statement

C. else statement

D. except statement

Correct Answer: BD

Reference: https://www.juniper.net/documentation/en_US/junos-pyez/topics/example/junos-pyez-programconfiguration-data-loading-from-file.html

QUESTION 4

You have enabled REST API traceoptions on your Junos device. Where does Junos store the associated log files in this scenario?

A. /var/chroot/rest-api/var/log

B. /var/home

C. /var/tmp

D. /var/log

Correct Answer: A

Reference: https://www.juniper.net/documentation/en_US/junos/information-products/pathway-pages/restapi/rest-api.pdf (50)

QUESTION 5

What are two data structures in JSON? (Choose two.)

A. objects

B. array

C. string

D. number

Correct Answer: AB

Reference: https://javaee.github.io/tutorial/jsonp001.html

QUESTION 6

Which two statements are true about data structures? (Choose two.)

A. YAML is human readable and supports serializing arbitrary native data structures

B. YAML follows the lowest common denominator data types and requires simple processing between different programming environments

C. JSON is language dependent, which uses conventions that are familiar to programmers of languages like C, C++, Java, Perl, and Python

D. JSON is simple to generate and parse, though human readability is sacrificed

Correct Answer: AC

QUESTION 7

Click the Exhibit button.

Which two actions are performed by the PyEZ Python script shown in the exhibit? (Choose two.)

```
from jnpr.junos import Device
from jnpr.junos.utils.config import Config
from jnpr.junos.exception import ConnectError

host = 'dcla.example.com'

def main():

        dev = Device(host=host)

        try:
                dev.open()
        except ConnectError as err:
                print ("Cannot connect to device: {0}".format(err))
                return

        cu = Config(dev)

        try:
                rescue = cu.rescue(action= "get", format = "text")
                if rescue is None:
                        print ("No existing rescue configuration.")
                        print ("Saving rescue configuration.")
                        cu.rescue(action="save")
                else:
                        print ("Rescue configuration found:")
                        print (rescue)
        except Exception as err:
                print (err)

        dev.close()

if _name_ == "_main_":
        main()
```

A. It saves the current configuration as a rescue configuration only if one does not exist

B. It prints the rescue configuration if one already exists

C. It prints the rescue configuration after it has been replaced

D. It always saves the current configuration as a rescue

Correct Answer: AB

QUESTION 8

Which two commands belong to the NETCONF Operation layer? (Choose two.)

A.

B.

C.

D.

Correct Answer: BC

QUESTION 9

Which development model is the classic approach to software development?
