QUESTION 1

An analyst creates a table visualization. There is one dimension, a few count type measures, and a percentage table calculation. When the analyst tries to download all 200,000 rows of results in CSV, the option is unavailable. The analyst has been provided permission to download all results.

Which action should the analyst take to download all results?

- A. Request that the admin user download this Look and share the file.
- B. Change the table calculation to use an offset() function.
- C. Contact the developer to create the percentage as a measure.
- D. Apply a custom limit to the download.

Correct Answer: D

QUESTION 2

Two weeks into the third quarter, an analyst needs to determine the total order count per month for only the first two quarters.

How should the analyst filter the query?

- A. Created Month "is in the first 2 quarters"
- B. Created Month "is in the past 2 complete quarters"
- C. Created Month "is in the past 2 quarters"
- D. Created Month "is in the last 6 months"

Correct Answer: C

QUESTION 3

An analyst creates a column chart showing the count of total orders and the count of returned orders on each date. The number of returned orders is much smaller than the number of total orders, so the columns for the returned orders are short and it is difficult to compare all the columns visually.

How should the analyst ensure that the differences between returned order counts for each day are more visible?

- A. Change the returned orders series to a line type.
- B. Move the returned orders series to a new right axis.
- C. Change the y-axis height to a higher number of pixels.
- D. Set the x-axis to use a log scale.

Correct Answer: C

QUESTION 4

An analyst needs to display data from two different sources together. There is a Look for each data source, but there is no shared field that can be combined. Both Looks are saved in the Shared folder.

How should the analyst display the data from both sources?

- A. use Merged Results to combine the data sources.
- B. Ask the LookML developer to build a new Explore.
- C. Add both Looks to a dashboard
- D. Pin both Looks to a board.

Correct Answer: C

QUESTION 5

A CEO wants to receive a daily email with the existing executive dashboard to review on a mobile device on the way to the office.

What should the analyst do to optimize the dashboard for mobile viewing?

- A. Schedule the dashboard as HTML to adjust automatically.
- B. Schedule the dashboard with the PDF format Use single column layout.
- C. Create a mobile-friendly version of the dashboard by rearranging the tiles, and schedule the dashboard.
- D. Schedule the dashboard with PDF paper size set to Fit Page to Dashboard.

Correct Answer: B

QUESTION 6

A global dashboard filter and the filter on a tile within that dashboard conflict because the global dashboard filter and the individual tile filter are based on the same field with different filter values.

What happens in this situation?

- A. The filter values of both filters will combine in an additive manner and both filters will apply.
- B. The individual tile's filter will override the global dashboard filter.
- C. The global dashboard filter will override the individual tile filter.
- D. The dashboard will break and warn the user that there are conflicting filter values.

Correct Answer: C

QUESTION 7

An analyst has a dashboard with a single filter on Created Date "is in the past year", but a tile on the dashboard is returning results for only the past 7 days. When the analyst selects "Explore from Here" on the tile, there are filters on both Created Date "is in the past year" and Created Time "is in the past 7 days".

How should the analyst make sure that only the filter set on the dashboard is applied to the tile?

- A. After selecting Explore from Here on the tile, remove the filter on Created Time and hit Save.
- B. After selecting Edit on the tile, add a filter on Created Date and hit Save.
- C. Edit the dashboard Created Date filter to update the tile's Created Time field under Tiles to Update.
- D. Edit the dashboard Created Date filter to update the tile's Created Time filter under Filters to Update.

Correct Answer: D

QUESTION 8

A business analyst is building a report of predicted sales. The business analyst wants to filter the results to only show dates in the next seven days. This filter should work whenever the results are generated.

Which filter expression should the business analyst use?

- A. 7 days from now
- B. After Today's Date for 7 days
- C. Today for 7 days
- D. For 7 days

Correct Answer: B

QUESTION 9

An executive needs to receive a dashboard every morning with data for the previous day only. The dashboard currently has a date filter defined. The executive must receive only the data requested, and the dashboard data needs to remain unchanged for all other users.

What should the analyst do to meet this requirement?

- A. Filter the dashboard for the advanced value "yesterday", and create a new schedule.
- B. Edit the dashboard data filters default value to be the previous day's date, and create a new schedule.
- C. Create a new schedule and modify the filter's default value to the previous day's date.

D. Create a new schedule and modify the schedule filter to be the advanced value "yesterday".

Correct Answer: B

QUESTION 10

An analyst has an Explore query that shows the sum of spend over time. The Explore query has the Sum of Spend measure pivoted by a Category of Spend dimension. The Category of Spend dimension has a value for Budgeted Spend and then categories for each type of unbudgeted spend.

Which visualization feature should the analyst use to separate budgeted spend visually from each category of unbudgeted spend?

- A. Display row totals for each category.
- B. Series type customization on budgeted spend.
- C. Grouped series positioning on budgeted spend.
- D. Transpose table to separate out budgeted spend.

Correct Answer: D
