QUESTION 1

You must expand an existing FAS8200 switchless cluster to a switched cluster and add a new FAS8200

HA pair in the cluster.

In this scenario, which three actions would you perform to expand the cluster? (Choose three.)

A. Ensure that the switchless-cluster network option is false.

B. Connect the existing nodes to the cluster switches.

C. Change the cluster ports for the existing HA pair.

D. Ensure that the switchless-cluster network option is true.

E. Join the new HA pair to the cluster.

Correct Answer: ABE

QUESTION 2

Click the Exhibit button.

```
Cluster_dst::> snapmirror policy show -policy XDPDefault -instance

                    Vserver:    vs0
      SnapMirror Policy Name:   XDPDefault
      SnapMirror Policy Type:   vault
               Policy Owner:    cluster-admin
                Tries Limit:    8
           Transfer Priority:   normal
   Ignore accesstime Enabled:   false
     Transfer Restartability:   always
 Network Compression Enabled:   false
             Create Snapshot:   false
                    Comment:    Default policy for XDP relationships with daily and weekly
                                rules.
      Total Number of Rules:    2
                 Total Keep:    59
                      Rules:    SnapMirror Label    Keep   Preserve   Warn   Schedule   Prefix
                                ----------------    ----   --------   ----   --------   ------
                                daily                7     false       0      -          -
                                weekly              52     false       0      -          -
```

An administrator realizes that daily snapshots are not being replicated to their destination. The

administrator can see the daily snapshots created at the source. The exhibit shows the policy in use.

Weekly snapshots are being replicated without a problem, and the SnapMirror relationship is showing as

"healthy".

In this scenario, what is causing the problem with the daily snapshot?

A. The SnapMirror label has not been applied to the daily snapshots.

B. The SVM peer is not working.

C. The daily snapshots at the source are busy due to the NDMP backup.

D. The vault policy applied to the source volume does not match the SnapMirror policy at the destination.

Correct Answer: B

QUESTION 3

Click the Exhibit button.

```
cluster1> system node run cluster1-01 wafl awa print

Aggregate cluster1_01_aggr1

Summary of the past 20 intervals

                                            max
                                            ---------------
Read Throughput (MB/s):                     181.772
Write Throughput (MB/s):                     550.611
Cacheable Read (%):                         12
Cacheable Write (%):                        30
Max Projected Cache Size (GiB):             787.077
```

You are asked to identify cache hit rates on your FAS8200 HA pair NAS volumes. You need to increase

performance of your HDD cluster1_01_aggr1 aggregate.

Referring to the exhibit, which NetApp technology achieves the requirement?

A. FlexCache

B. Flash Pool

C. FabricPool

D. MAX Data

Correct Answer: B

QUESTION 4

Regarding root partitioned disks in an ONTAP system, which three types of objects are associated with ADP? (Choose three.)

A. array LUN

B. root partition

C. container disk

D. data partition

E. shared disk

Correct Answer: BCD

QUESTION 5

An administrator forgot to update the cabling sheet for a core Cisco switch and cannot recall which ports

were used by the NetApp FAS system.

Which command should the administrator run to obtain this information?

A. network port show

B. network device-discovery show

C. network interface show

D. network port broadcast-domain show

Correct Answer: A

Reference: https://kb.netapp.com/app/answers/answer_view/a_id/1032596/~/how-to-diagnose-port-issuesin-clustered-data-ontap-

QUESTION 6

If an SVM is renamed and it is participating in an intercluster SVM peer relationship, what is the result?

A. SVM peers are removed and they need to be re-created.

B. Snapshot copies are renamed with the new SVM unique identifier.

C. SnapMirror relationships appear as broken and a resync is required.

D. Remote clusters are updated with the new peer SVM name.

Correct Answer: A

QUESTION 7

A customer configured CIFS in an ONTAP 9.5 SVM. The customer wants to verify if the "CIFS Server" is

accessible from each node of the cluster.

In this scenario, which command will accomplish this task?

A. vserver cifs session

B. vserver cifs connection show

C. vserver cifs check

D. vserver cifs domain discovered-servers

Correct Answer: C

Reference: https://docs.netapp.com/ontap-9/index.jsp?topic=%2Fcom.netapp.doc.dot-cm-cmpr-950%2Fvserver__cifs__check.html

QUESTION 8

Which three name services does ONTAP support? (Choose three.)

A. HTTP

B. local files

C. LDAP

D. NIS

E. SNMP

Correct Answer: BCD

Reference: https://library.netapp.com/ecmdocs/ECMP1610208/html/GUID-CF638806-8445-4306-9307804010B317A8.html

QUESTION 9

A storage administrator has a single-node FAS cluster. The administrator wants to add a second node to

convert the FAS storage array into a switchless cluster.

In this scenario, what would the administrator do to accomplish the task?

A. Add a new AFF HA pair and replace the existing FAS.

B. Add a cluster interconnect switch and a second FAS of the same model.

C. Add a new single node AFF controller to the existing FAS storage array.

D. Add a new single node FAS controller of the same model.

Correct Answer: D

QUESTION 10

When you create a new SSD storage pool for use with Flash Pools, how many allocation units are assigned to each node in the HA pair by default?

A. 8

B. 2

C. 1

D. 4

Correct Answer: B

Reference: https://docs.netapp.com/ontap-9/topic/com.netapp.doc.dot-cm-psmg/GUID-610B95D3-B0F34890-9A45-8A343BF40B29.html

QUESTION 11

Which two interface group types enable the load balancing algorithm to be used? (Choose two.)

A. load balance mode

B. QoS mode

C. dynamic multimode

D. static multimode

Correct Answer: CD

Reference: https://docs.netapp.com/ontap-9/index.jsp?topic=%2Fcom.netapp.doc.dot-cm-nmg%2FGUIDF4924A4C-9B7B-4281-BD07-A2F195BAC42D.html

QUESTION 12

You have a 4-node cluster with 2x AFF A700 controllers and 2x FAS8200 controllers. A volume set to default settings is moved from a FAS8200 to an AFF A700 using the volume move command. In this scenario, which volume parameter change will allow for data compaction?

A. space-allocation

B. security-style

C. space-guarantee

D. fractional-reserve

Correct Answer: C

QUESTION 13

Click the Exhibit button.

IPspace	Vserver List	Broadcast Domains
Cluster		
	Cluster	Cluster
Default		
	svm1, svm2, cluster1	Default
IPspace1		
	SVM1A, SVM2A,	IPspace1
IPspace2		
	SVM2A, SVM2B,	IPspace2

You execute the cluster1::> network ipspace show command, and notice that two IPspaces are not able to

be renamed or deleted.

Referring to the exhibit, what are these two IPspaces? (Choose two.)

A. IPspace1

B. Default

C. IPspace2

D. Cluster

Correct Answer: BD

QUESTION 14

An administrator is configuring a third-party software for NDMP. The application is targeting the IP of the data LIF of the SVM called "SVM1". NDMP is configured as the SVM scope. The NDMP service is not enabled for the admin SVM. SVM1 has a user called "Tom" with the backup role. Tom can connect by using SSH to the controller with the credentials that he used to configure the third-party software. The authentication of the third-party software is failing. In this scenario, what is the reason for the authentication failure?

A. The NDMP password has not been generated for Tom.

B. The application is not targeting the IP of the cluster or node management LIF.

C. The NDMP service is not enabled for the admin SVM.

D. The user Tom does not belong to the admin SVM.

Correct Answer: C

QUESTION 15

Which FabricPool policy would you apply only on a SnapMirror destination volume?

A. backup

B. destination

C. auto

D. manual

Correct Answer: A
