QUESTION 1

CDC guarantees data integrity by using two-phase commit operation between _____.

- A. source tables and source metadata
- B. target tables and target metadata
- C. source tables and target Tables
- D. source metadata and target metadata

Correct Answer: B

QUESTION 2

Is CDC capable of replicating DDL changes?

- A. Yes, this capability is natively built in to all editions of CDC.
- B. Yes, this capability can be implemented using CDC user exits.
- C. Yes, but this capability is limited to certain data sources and platforms at this time.
- D. None of the above.

Correct Answer: C

QUESTION 3

Which of the following capabilities are available when integrating CDC with DataStage using Direct Connect method?

- A. Auto-start/stop of DataStage Job
- B. Two-way communication for status updates with CDC DataStage object
- C. The ability to generate a default DataStage job using CDC that can be imported into and customized using DataStage
- D. All of the above.

Correct Answer: D

QUESTION 4

Which of the following database objects can be replicated while integrating heterogeneous data sources?

- A. Tables and Stored Procedures

B. Tables and Tablespaces

C. Tables and Views

D. Table objects only

Correct Answer: D

QUESTION 5

A CDC administrator is being asked to replicate warehouse data to a reporting server in order to facilitate generating daily, weekly, and monthly performance reports for the management. Which of the following setups, in your opinion, is considered a "best practice"?

A. Replicate all tables using "Refresh" mode but run them once a day, week, or month

B. Replicate all tables using "Mirror Continuous" mode but run them once a day, week, or month

C. Replicate all tables using "Mirror Continuous" method and run them continuously

D. Replicate only "Summarized" data using "Mirror Continuous" method and run them once a day, week, or month as necessary

Correct Answer: C

QUESTION 6

Which of the following replication methods is best suited for de-normalizing tables?

A. Adaptive Apply

B. Summarization

C. Consolidation ?One-to-One

D. Consolidation ?One-to-Many

Correct Answer: C

QUESTION 7

Which of the following replication methods may be used to maintain inventory levels up-to-date in real-time?

A. Adaptive Apply

B. Summarization

C. Consolidation ?One-to-One

D. Consolidation ?One-to-Many

Correct Answer: B

QUESTION 8

Which of the following sets of user roles is supported in CDC?

- A. System Administrator, Administrator, Operator and Monitor
- B. System Administrator, Database Administrator, Operator and Monitor
- C. System Administrator, Administrator, Replication User and Monitor
- D. System Administrator, Database Administrator, Replication User and Monitor

Correct Answer: A

QUESTION 9

Which of the following will be a valid SOURCE for "InfoSphere Change Data Capture for Oracle Replication"?

- A. Oracle database running on any supported platform
- B. Oracle database running on Windows platform only
- C. Any heterogeneous data source running on any supported hardware platform
- D. Any heterogeneous data source running on Windows platform

Correct Answer: A

QUESTION 10

Which additional step may be needed to configure bi-directional replication?

- A. specify '\\Conflict Detection\\' rules
- B. specify Primary Key
- C. specify a Unique Index
- D. restart the CDC source instance

Correct Answer: A
