QUESTION 1

The primary purpose of a production ruleset is to allow rules to be

- A. tested in a production environment
- B. updated in a production environment
- C. reused in multiple production environments
- D. migrated to a production environment

Correct Answer: D

QUESTION 2

Which statement regarding managing encrypted data in Pega Platform is true?

- A. Encrypted properties cannot be referenced using filter conditions in reports.
- B. Property-level encryption is a time-efficient method to encrypt data.
- C. Encrypted properties can be referenced in report definitions.
- D. Each organization uses a custom key to encrypt its data.

Correct Answer: AD

QUESTION 3

Which two statements are true about database tables in Pega Platform? (Choose Two)

- A. The PegaRULES database contains rules while PegaDATA contains work instances.
- B. The Database Table rule allows configuration of a connection to a specific table.
- C. The History record table contains a record of when each user logged in to the system.
- D. The report definition rule should only be used against one table for performance reasons.

Correct Answer: BC

QUESTION 4

A courier company wants a mobile app to scan and track the parcels collected from remote areas with no internet access. Which mobile app do you develop to fulfill the requirement?

- A. Signed app

- B. Unsigned app
- C. Native app
- D. SDK app

Correct Answer: C

QUESTION 5

A report needs to list the user ID of the manager of the operator who creates a time-off case. The report provides information from the MyCo-HR-SelfService-Work-TimeOff and Data-Admin-Operator-ID classes.

Which two options independently satisfy the business outcome? (Choose Two)

- A. Configure a class join on the report definition to join operator information to each case.
- B. Add the operator ID to the report definition as a parameter.
- C. Use an association rule to join operator information to each case.
- D. Specify both classes in the Pages and Classes tab on the report definition.

Correct Answer: AD

QUESTION 6

Teams X and Y work on different enhancements in the same ruleset. The release date for each enhancement is uncertain.

Which two options, when performed together, allow each team to keep its work separate? (Choose Two)

- A. Create a new ruleset version for one of the teams.
- B. Create a branch ruleset for each team.
- C. Apply privileges to the rules each team configures.
- D. Create access groups for each of the teams.

Correct Answer: AB

QUESTION 7

What is the function of class mapping for reports?

- A. Ensure all data from one report belongs to a single Case type instance.
- B. Create a new Database table record for a Pega Platform class.
- C. Assign an ID to a class so reports can reference specific properties.

D. Retrieve data from an associated database table.

Correct Answer: D

QUESTION 8

A hospital uses a case type to manage the treatment of patients visiting the Emergency Room (ER). Cases are created when the patient checks in at the registration desk, and are resolved when the patient is released from the hospital.

Stakeholders identify the following security requirements for the case type.

Patients access cases on a read-only basis.

Patients can only access their own cases.

Doctors and nurses can modify cases throughout the case life cycle.

Only doctors are allowed to write prescriptions.

Which configuration allows doctors and nurses to modify cases while complying with all identified security requirements?

- A. Create two access roles, one for doctors and one for nurses, and set the modify action for each to 5.
- B. Create two access roles, one for doctors and one for nurses, and set the modify action for each to 1.
- C. Create a single access role for both doctors and nurses, and set the modify action to 5.
- D. Create a single access role for both doctors and nurses, and set the modify action to 1.

Correct Answer: A

QUESTION 9

Which three mobile device features can you leverage by using Pega Mobile Client? (Choose Three)

- A. Barcode scanning
- B. Text messages
- C. Biometric identification
- D. Push notifications
- E. Phone calls

Correct Answer: ACD

QUESTION 10

You configure a child case to override the locking strategy of the parent case. The parent case has a time-out value of

one hour.

Which time-out value option is recommended for the child case?

- A. Set the Access time-out value equal to the parent case time-out value.
- B. Set the Access time-out value less than the parent case time-out value.
- C. Set the Access time-out value greater than the parent case time-out value.
- D. The Access time-out value on the child case cannot be changed.

Correct Answer: A

QUESTION 11

While running an application, a user notes that a system exception occurred. Which log do you review to identify the issue?

- A. Pega
- B. Alert
- C. AlertSecurity
- D. BIX

Correct Answer: B
