QUESTION 1

What are three requirements to automate service deployment of a VM-Series firewall from an NSX Manager? (Choose three)

- A. vCenter has been given Palo Alto Networks subscription licenses for VM-Series firewalls.
- B. The deployed VM-Series firewall can establish communications with Panorama.
- C. Panorama has been configured to recognize both the NSX Manager and vCenter.
- D. Panorama can establish communications to the public Palo Alto Networks update servers.
- E. The NSX Manager completed the host preparation prior to the VM-Series firewall service deployment.

Correct Answer: ACD

QUESTION 2

Which three software components have integration for deploying a VM-Series firewall in OpenStack? (Choose three)

- A. Mirantis OpenStack distribution
- B. Nuage VSP SDN controller
- C. VMWare NSX for OpenStack
- D. Cisco ACI
- E. Contrail SDN controller

Correct Answer: ACD

QUESTION 3

Which option describes Arista's micro-segmentation?

- A. Arista and VMware are extending secure segmentation with an open API (RESTJSON)-based exchange, which allows NSX to federate with CloudVision to extend the micro-segmentation policy for physical workloads.
- B. Arista and Kubernetes are extending secure segmentation with an open API (RESTJSON)-based exchange, which allows Kubernetes to federate with CloudVision to extend the micro-segmentation policy for physical workloads.
- C. Arista's micro-segmentation and macro-segmentation are identical concepts that can be used interchangeably
- D. Arista and VMware both perform identical functions for NGFW micro-segmentation

Correct Answer: B

QUESTION 4

How does Twistlock offer workload security at runtime?

- A. works with the IDP to identify over-privileged containers and services and restricts network access
- B. quarantines containers that demonstrate increased CPU and memory usage
- C. automatically patches vulnerabilities and compliance issues for every container and service
- D. builds a whitelist security model automatically for every container and service

Correct Answer: A

QUESTION 5

How are workloads protected in Prisma Cloud Enterprise and Prisma Cloud Compute?

- A. Prisma Cloud enterprise and Prisma Cloud Computes provides identical workload capabilities.
- B. Prisma Cloud Enterprise provides workload protection through integration with the NGFW.
- C. Prisma Cloud Compute offers agentless protection for all workload types.
- D. Prisma Cloud Enterprise does not offer workload protection because it is a SaaS based product and agentless.

Correct Answer: A

QUESTION 6

Which is not a SaaS product?

- A. Yahoo Maps
- B. Microsoft Office 365
- C. Microsoft Azure
- D. Google Docs

Correct Answer: C

QUESTION 7

When deploying VM series on NSX platform to support micro-segmentation, which statement is NOT correct?

- A. VM-Series uses NetX API to receive and send packets

- B. Traffic steering rules could be defined on Panorama and pushed to NSX Manager
- C. VM-Series provide Multi-tenancy support with multiple zones
- D. One panorama could support to connect with only one NSX manager

Correct Answer: A

QUESTION 8

When would a PA-7000 Series NPC GQXM Card be preferable to a PA-7000 Series NPC GQ Card?

- A. When the organization requires a greater number of sessions.
- B. When the environment has a need for more SFP+ interfaces.
- C. When the organization requires gear with a smaller slot size.
- D. When the environment has a need for more policy rules.

Correct Answer: A

QUESTION 9

Which task is required to create steering rules on NSX-V Manager?

- A. Select Steering Rules > 3rd Party Firewalls > Palo Alto Networks and then populate the object with the required details
- B. Configure the rule in Panorama and push it to NSX-V Manager.
- C. Select Fabric > Access Policies > Quick Start and follow the prompts
- D. Add a network introspective service and select Redirect to Service under Action.

Correct Answer: A

QUESTION 10

Which configuration is required in NSX for Panorama to use the tags from security groups in dynamic address groups?

- A. Create security groups only.
- B. Create security groups and mark them as exchangeable.
- C. Create security groups with tags marked as shareable.
- D. Create security groups and use them in an NSX-to-Palo Alto Networks redirection policy.

Correct Answer: A
