**QUESTION 1**

An international travel operator has a customer services department responsible for investigating complaints made by holidaymakers. The department has five members of staff based in its head office.

A business analyst is working on a project to replace the existing holiday management system and has compiled the following requirements from a range of elicitation activities:

1.  
The solution should be fully accessible in the English, French and German languages.
2.  
Users should be able to retrieve holiday details by booking reference number.
3.  
Holiday providers shall be able to add the details, date and prices of their tours directly onto the system.
4.  
The solution will be able to support up to 2000 concurrent active users.
5.  
The solution will be restorable from back-up within 4 hours.
6.  
The solution should be able to retrieve holiday details within 10 seconds.

Which of the following represents the correct categorization of the requirements?

- A. 2x Functional requirement 2x Non-functional requirement 1x General requirement 1x Technical requirement
- B. 2x Functional requirement 2x Non-Functional requirement 2x General requirement
- C. 2x Functional requirement 3x Non Functional requirement 1x General requirement
- D. 3x Functional requirement 2x Non-functional requirement 1x General requirement

Correct Answer: B

---

**QUESTION 2**

In a requirements catalogue, a distinction is often made between business level and solution level requirements.

Why is this distinction made?

- A. To allow the high-level goals of the solution to be expressed as solution requirements.
- B. To highlight the technical constraints in which the solution requirements must operate.

C. To reduce the number of functional requirements in the requirements catalogue.

D. To separate strategic requirements from those that only provide value to the project.

Correct Answer: A

---

**QUESTION 3**

A business analyst is in the process of completing the requirements document for a project. She has made the following 'to-do' list of actions to help keep track of her work:

1.

Need to amend the description of the scope of the project.

2.

Need to record the terminology used throughout the document.

3.

Need to add the use cases and the as-is business process diagrams.

When she completes all of these actions, which requirements document sections will not have been updated?

A. Data models and introduction and background.

B. Function models and requirements catalogue.

C. Requirements catalogue and data model.

D. Requirements catalogue and glossary of terms.

Correct Answer: C

---

**QUESTION 4**

Peter is analyzing requirements elicited for a sales order system. He is looking at the following requirement to see if it is fit for purpose:

'The system shall calculate the total volume of orders received per salesman on Fridays, except when the end of year reports are being run'.

During requirements analysis, requirements are checked for:

A) Ambiguity.

B) Relevance.

C) Clarity.

D) Whether the requirement is a solution.

On which of these checks would this requirement fail?

A. A, B and C

B. A and C

C. B, C and D

D. D only

Correct Answer: B

---

### QUESTION 5

Isamu is a business analyst working on a project. Unfortunately, it is not progressing as hoped or planned.

He has identified that the main issues with the users on the project are:

1) They manage complex processes and they do not seem to be able to articulate their needs.

2) They claim they cannot engage in requirements elicitation as they simply do not know what is possible.

Which elicitation technique would best address both these issues?

A. Activity sampling

B. Focus group

C. Prototyping

D. Scenario analysis

Correct Answer: A

---

### QUESTION 6

A project has been running at the Wield Engineering Company for six months. The requirements have been signed off and development is underway; however, the development team has hit a problem and cannot implement an approved requirement. The business analyst has been asked to discuss this with the requirement owner.

Before booking a meeting with the owner, the business analyst decides to check whether there are more requirements affected by this technical limitation.

What will help the business analyst discover other affected requirements?

A. Change control

B. Configuration control

C. Horizontal traceability

D. Vertical traceability

Correct Answer: D

---

## QUESTION 7

A business analyst working on a project has been informed that changes are required in a particular requirement; she has revisited the requirement set and is unable to determine other requirements that might be impacted by such changes.

Which element of requirements management appears to be missing?

- A. Change control
- B. Requirements cross-referencing
- C. Requirements identification
- D. Requirements origin and ownership

Correct Answer: C

---

## QUESTION 8

A business analyst working on a project has identified:

3 requirements for which there is a workaround and the users can live without;

2 requirements that the users can live without for now;

15 requirements which, if not delivered, will make the solution unworkable or useless.

When these requirements are prioritized using MoSCoW, which of the following categories will not be used?

- A. M
- B. S
- C. C
- D. W

Correct Answer: D

---

## QUESTION 9

A business analyst is allocating elicited requirements to an appropriate category in a requirements catalogue. Here are five of the captured requirements:

- A) A sales person must be able to confirm a sales order.
- B) Only customers with a 'normal' status should be permitted to place orders.
- C) The order management system should hold the data for 'barred' customers for five years.
- D) A stock picker must be able to mark an order as 'picked'
- E) The order management team should be able to view sales orders by time range and status.

Which of these requirements will be classified as functional requirements in the requirements catalogue?

- A. A, B and C
- B. A, D and E
- C. B, C and D
- D. C, D and E

Correct Answer: A

---

## QUESTION 10

An inexperienced business analyst has been asked to conduct scenario analysis. The notes he made about the topic during his training course are rather disorganized, with correct and incorrect assumptions grouped together.

Which of the following notes he made about scenario analysis is incorrect?

- A. A workshop discovery technique
- B. Can form the basis of test scripts
- C. Explicitly considers exception situations
- D. Helps to capture tacit knowledge

Correct Answer: B
