## QUESTION 1

Two common, yet opposing SOA delivery approaches are:

- A. bottom-up and upside-down
- B. top-down and left-to-right
- C. upside-down and left-to-right
- D. none of the above

Correct Answer: D

---

## QUESTION 2

When planning a transition toward SOA, we are usually required to balance the goals with the requirements.

- A. strategic (long-term), tactical (short-term)
- B. strategic (long-term), unimportant (low priority)
- C. tactical (short-term), unimportant (low priority)
- D. unimportant (low priority), important (high priority)

Correct Answer: A

---

## QUESTION 3

You can create or service inventories.

- A. process-specific, process-wide
- B. domain, enterprise
- C. domain, process-specific
- D. enterprise, process-specific

Correct Answer: B

---

## QUESTION 4

Service-oriented computing aims to reduce the burden of IT upon the organization as a whole by reducing waste, operational cost, and overhead associated with the governance and evolution of the IT enterprise. Select the correct answer

- A. True

B. False

Correct Answer: A

---

## QUESTION 5

Service-oriented computing aims to increase an organization's responsiveness by allowing it to adapt to change more efficiently and effectively. This is known as:

- A. organizational diversity
- B. organizational agility
- C. organizational federation
- D. organizational interoperability

Correct Answer: B

---

## QUESTION 6

Which of the following statements are true? SELECT ALL THAT APPLY

- A. A service inventory establishes a boundary for a collection of services.
- B. Service inventories represent collections of related services that are independently standardized and governed.
- C. The quantity of services within a service inventory will increase as new services that belong within the service inventory boundary are delivered.
- D. Service inventories are ideally planned and modeled ahead of time via the creation of service inventory blueprints.

Correct Answer: ABCD

---

## QUESTION 7

Which of the following statements are false? SELECT ALL THAT APPLY

- A. Services are delivered into service inventories and are aggregated into service compositions. B. Services are delivered as service compositions that are aggregated into a set of service inventories.
- B. Services are delivered into service compositions that are composed by service inventories.
- C. Services are delivered as service inventories that are composed by other service inventories.

Correct Answer: BC

---

**QUESTION 8**

When following the distinct lifecycle phases of an SOA delivery project you are: A. discouraged from involving business analysts as part of the definition of services so that services remain technically focused

B. discouraged from involving technology experts as part of the definition of services so that services remain business focused

C. encouraged to have business analysts and technology experts collaborate in the definition of services so that services have and retain an alignment of technology and business

D. none of the above

Correct Answer: C

---

**QUESTION 9**

Which of the following statements is false?

A. The standardization of service contracts supports the strategic goal of Increased Intrinsic Interoperability.

B. The standardization of service contracts supports the strategic goal of Increased Governance Integration.

C. The standardization of service contracts is supported by service-orientation.

D. The standardization of service contracts supports the strategic goal of Increased Federation.

Correct Answer: B

---

**QUESTION 10**

What is the minimum number of domain service inventories you need in order to create a single enterprise service inventory?

A. two

B. three

C. one for each business domain

D. An enterprise service inventory is not comprised of domain service inventories.

Correct Answer: D

---

**QUESTION 11**

Which of the following statements is true?

A. To apply service-orientation requires the use of Web services.

B. Web services are required in order to build service-oriented solutions.

C. When discussing SOA and service-oriented computing, the term "Web service" must always be synonymous with (have the same meaning as) the term "service".

D. None of these statements are true.

Correct Answer: D

---

## QUESTION 12

Which of the following statements is true?

A. Service-orientation is a revolutionary design paradigm comprised solely of new design techniques and practices never before used in IT's history.

B. The only known historical influence of the service-orientation design paradigm is procedural programming.

C. The service-orientation design paradigm has been influenced by several established design paradigms and platforms.

D. None of the above statements are true.

Correct Answer: C

---

## QUESTION 13

Which of the following statements is false?

A. Industry standards are usually produced by standards organizations.

B. Industry standards are usually created by standards committees so that they do not favor any one vendor or organization.

C. The use of industry standards alone automatically results in fully standardized service-oriented solutions.

D. XML is an example of an industry standard.

Correct Answer: C

---

## QUESTION 14

The ROI (return on investment) potential of services is increased by:

A. increasing the amount of agnostic services within an inventory

B. increasing the amount of non-agnostic services within an inventory

C. increasing the amount of legacy systems within an enterprise

D. decreasing the scope of a service inventory

Correct Answer: A

---

## QUESTION 15

From an organizational impact perspective, SOA initiatives can introduce: SELECT ALL THAT APPLY

- A. new processes
- B. new roles
- C. new skill-sets
- D. change to how project teams are structured

Correct Answer: ABCD
