Correct Answer: C

QUESTION 4

Management has requested a DRP. It will be used to ensure the return to operation in a timely manner. Which of the following topics should be included? (Choose three.)

A. Time of year to switch to the DR solution

B. Effort required to switch over to the DR solution

C. How administrators will be required to support the DR solution

D. How many users will be using the systems while in the DR solution

E. Cost comparison of the different DR methods

F. How many servers are available to deploy the DR solution

G. SLA or time frame to switch over to the DR solution

Correct Answer: BCG

QUESTION 5

A company\\'s legal and regulatory departments have drafted a new policy in which emails must be retained for no longer than three years. Which of the following locations should an administrator configure when complying with the new policy? (Select THREE).

A. Local workstations

B. Backup tapes

C. Domain controllers

D. Email server

E. SMTP gateway

F. Proxy server

Correct Answer: ABD

QUESTION 6

A server technician is notified that a server IP address is changing on the network. The technician changes the static IP address on the NIC to match the new address. However, when the technician issues the nslookup command with the hostname of the machine, the old IP address assignment is still being reported. The technician also performs a reverse DNS lookup using the old IP and verifies the FQDN of the server is reported. Given this scenario, which of the following should the technician inspect to resolve this issue? (Select TWO).

A. DNS CNAME record type

B. DNS A record type

C. DNS PTR record type

D. DNS SRV record type

E. DNS MX record type

Correct Answer: BC

QUESTION 7

A technician is tasked with connecting a server to a NAS. Which of the following connection types should be used?

A. HBA

B. Ethernet

C. Fiber Fabric

D. Multiplexer

Correct Answer: B

QUESTION 8

A server is installed in a location that is prone to power failures. While the server is connected to a UPS, the systems administrator is still concerned about ensuring the integrity of the data being written to the RAID array.

Which of the following is the systems administrator MOST likely to do?

A. Install additional memory on the RAID controller.

B. Install redundant RAID controllers.

C. Install battery-backed cache on the RAID controller.

D. Install updated firmware on the RAID controller.

Correct Answer: C

QUESTION 9

Which of the following is a reason for setting up a VLAN?

A. It is required for 802.1X security.

B. It connects virtual network cards to a hypervisor.

C. It is required for SSL/TLS security.

D. It creates a logical separation of a physical network.

Correct Answer: D

QUESTION 10

While installing patches, a systems administrator is disconnected from a server. The administrator attempts to ping the server and receives no response. Which of the following tools is MOST likely to help in this situation?

A. RDP

B. iLO

C. VNC

D. SSH

Correct Answer: B

QUESTION 11
