What are two benefits of using client-driven PST migration? (Select two.)

- A. it is the fastest PST migration method
- B. corrupted PSTs are fixed automatically during migration
- C. it copies items it is loading in chunks into the local Vault Cache, avoiding extra downloads
- D. PST files bigger than 20GB are migrated in bigger chunks, avoiding the file table corruption in a PST file during migration
- E. it allows PST migration to continue while Outlook is open

Correct Answer: CE

---

**QUESTION 6**

An administrator needs to remove an Index Server from an Index Server Group and place it in another group.

When can this process be completed?

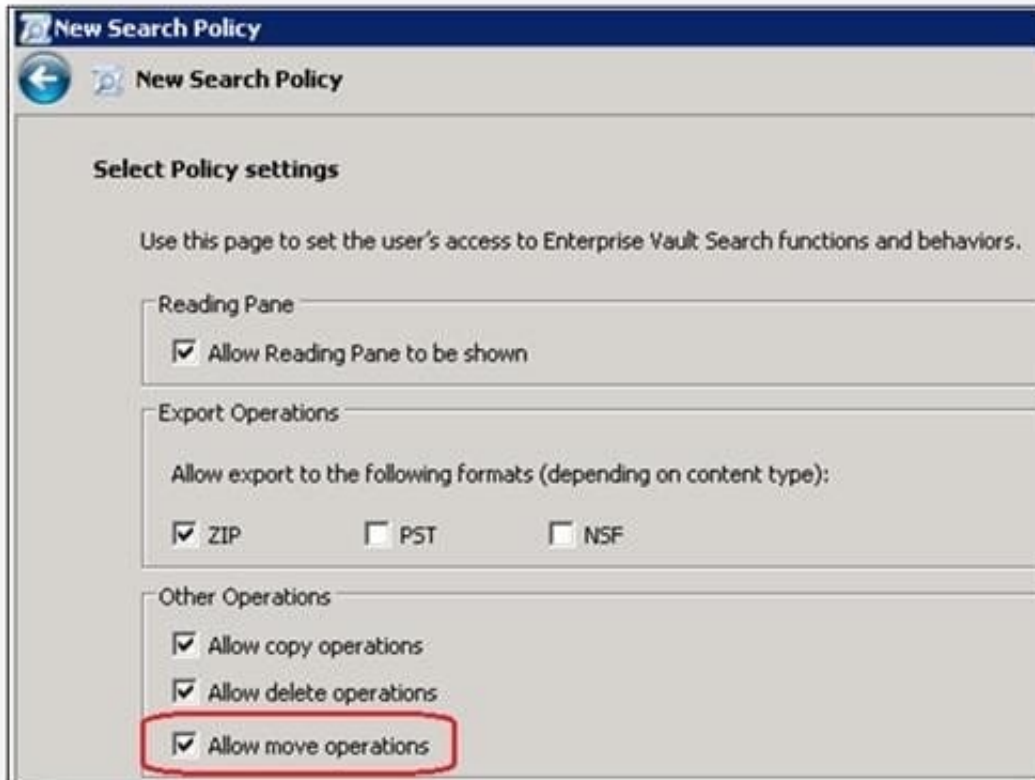

- A. during the processing time of the Index Administration task
- B. before archived items have been indexed
- C. when the Indexing Service is stopped
- D. after indexes have been put into Backup mode

Correct Answer: B

---

**QUESTION 7**

Refer to the exhibit.

Which capability does the "Allow move operations" setting provide?

- A. users can move items within the archive
- B. users can restore items to the original location and simultaneously delete the archived versions
- C. users can restore items as a ZIP file and simultaneously delete the archived versions
- D. users can move items into a ZIP file

Correct Answer: B

---

#### QUESTION 8

A Veritas Enterprise Vault 12.x for Exchange (EV) administrator activated Auditing at the Directory level. During this process, the administrator created the audit database and can log on the SQL server without errors. The administrator checks the content of the audit database and notices that nothing is being audited.

How should the administrator resolve this issue?

- A. after enabling auditing on the EV Directory, restart the EV Admin Service level
- B. enable Auditing in the Exchange Server properties in the VAC and select the auditing options
- C. enable Auditing in the EV Server properties in the VAC and select the auditing options

D. enable Auditing in the EV Site properties in the VAC and select the auditing options

Correct Answer: C

---

## QUESTION 9

In Outlook, a user sends a manual archiving request on an item and notices that the pending email item is reverted back to its original message class.

What is the likely cause?

- A. the message class IPM.Note\* is unselected
- B. the Index Service is stopped
- C. the Exchange Mailbox Archiving task has failed
- D. the Vault Store is in Backup mode

Correct Answer: D

---

## QUESTION 10

An administrator has created a number of Ready Partitions for Vault Store Partition rollover. How can the rollover order be changed?

- A. use a PowerShell script cmdlet: Start-PartitionRollover
- B. use the Vault Administration Console: Site > Common Tasks > Storage Management
- C. use a PowerShell script cmdlet: Set-PartitionPriority
- D. use the Vault Administration Console: Vault Store > Properties > Partition Rollover

Correct Answer: D

---

## QUESTION 11

An organization has added a custom Outlook form containing a new message class.

Which steps must the administrator perform to ensure the new form is archived from users\' mailboxes?

- A. add the form to the Directory > Properties and then include it on the appropriate Mailbox policies
- B. add the form to the Directory > Properties and then include it on the appropriate Desktop policies
- C. add the form to the Site > Properties and then include it on the appropriate Mailbox policies
- D. add the form to the Site > Properties and then include it on the appropriate Desktop policies

Correct Answer: A

---

12.x

?

A.

SQL Management Studio

B.

Monitoring Database

C.

EV Storage Verification and Reporting

D.

EV Database Upgrader

Correct Answer: D

---

## QUESTION 15

A Veritas Enterprise Vault 12.x environment contains a Vault Store Group called VSG1. VSG1 contains two Vault Stores, JournalVS and MailboxVS, each of which has its sharing level set to "Share within group." Bob sends an e-mail to Alice at 12:00 PM, a copy of which is sent to the journal mailbox and archived shortly thereafter by the Journal Archiving task to an Exchange Journal Archive residing in JournalVS. Later that night, during the scheduled mailbox archiving window, Alice's copy of the e-mail is archived from her mailbox to her archive which resides in MailboxVS.

Which files will be created in the open Partition of the MailboxVS as this e-mail is archived from Alice's mailbox, based on the Optimized Single Instance Storage (OSIS) model?

- A. one .DVS file
- B. one .DVS file and one or more .DVSSP files
- C. one .DVS file and one or more .DVSCC files
- D. no files will be created

Correct Answer: C
