QUESTION 1

Which of the following is required to enable Tape Parallel Processing?

- A. The source repository for the tape job is a Scale-Out Backup Repository
- B. The tape library has multiple drives
- C. Two tape jobs are processed at the same time
- D. The tape drive has multiple tapes

Correct Answer: B

https://helpcenter.veeam.com/backup/free/parallel_processing.html

QUESTION 2

Which of the following are true regarding Quick Backup? (Choose two.)

- A. Quick Backup can be run for both incremental and reverse incremental backup chains.
- B. A full backup file will be created if one does not already exist.
- C. Quick Backup is supported for separate vCloud Director VMs as well as for vApps.
- D. From the retention policy perspective, a partial restore point created by Quick Backup is grouped with a regular restore point neighboring it.

Correct Answer: AD

QUESTION 3

Which of the following Veeam Backup and Replication jobs can be set up to support GFS retention? (Choose two.)

- A. Backup Copy
- B. Backup
- C. Backup to tape
- D. Replication
- E. Configuration Backup

Correct Answer: AB

QUESTION 4

Which of the following are benefits utilizing the Backup from Storage Snapshots feature when backing up virtual machines from a VMware vSphere environment? (Choose two.)

- A. Lower Recovery Point Objective (RPO)
- B. Lower impact on WAN link during off-site backups
- C. Lower impact on production datastores
- D. Higher transfer speed from production datastores
- E. Lower Recovery Time Objective (RTO)

Correct Answer: AD

QUESTION 5

Which requirements must be met in order to perform transaction log backups for a database on a Microsoft SQL Server with Veeam Backup and Replication? (Choose the 2 appropriate options)

- A. The recovery model for the database must be set to Simple.
- B. The recovery model for the database must be set to Full or Bulk-Logged.
- C. No other backup tool truncates the SQL server's log files.
- D. The database must have its log files on a separate VMDK.

Correct Answer: BC

QUESTION 6

Are credentials included in configuration backups?

- A. Yes, both username(s) and password(s) - but only if restored to same machine.
- B. Yes, both username(s) and password(s)
- C. Yes, but only username(s) are saved.
- D. No, credentials are never included.
- E. Yes, but it is optional to include password(s).

Correct Answer: C

QUESTION 7

Which of the following statements regarding encryption in Veeam Backup and Replication are true? (Choose three.)

- A. If data is encrypted at rest, it means a Backup to Tape job is storing encrypted backups on tape
- B. If data is encrypted at rest, it means a Backup Job targeting a Backup Repository has encryption enabled
- C. A Backup Job has encryption enabled and is used at the source for a Backup to tape Job. If the Tape Media Pool has encryption enabled, the data will be encrypted a second time
- D. A Backup Job has encryption enabled and is used at the source for a Backup to tape Job. If the Tape Media Pool has encryption enabled, the data will be not encrypted a second time
- E. To ensure backups stored on tape are encrypted, enable encryption in the Backup to Tape job
- F. To ensure backups stored on tape are encrypted, enable encryption in the Tape Media Pool

Correct Answer: ACF

QUESTION 8

Which of the following restore options is NOT available to an administrator account in Veeam Backup Enterprise Manager?

- A. Full VM Recovery
- B. Application Items Recovery
- C. File Level Recovery
- D. Instant Recovery

Correct Answer: D

QUESTION 9

Veeam is used for replicating VMware VMs. The production environment is comprised of two networks:

192.168.1.0/24 and 172.16.0.0/16.

A web application requires a database server (whose IP address is 172.21.0.12) to receive queries from a web client (whose IP address is 192.168.1.32).

The replicas are spread over multiple hosts.

A backup administrator needs to configure a virtual lab to test a web client to database server query.

Which of the following virtual lab types must be configured?

- A. Advanced multi-host
- B. Advanced single-host
- C. All virtual lab configurations would support that

D. Basic single-host

Correct Answer: B

QUESTION 10

Which roles are performed by the client with the remote console installed? (Choose three.)

- A. Remote access
- B. A mount server in remote restore scenarios
- C. A configuration backup repository
- D. Remote PowerShell capabilities
- E. A default backup proxy

Correct Answer: BCD

QUESTION 11

Choose the correct statements about the Failover Plan functionality: (Choose two.)

- A. Undo failover can be performed for the entire Failover Plan group
- B. The whole Failover Plan group can be failed back using the Commit failback option
- C. Failover Plans must be created in advance of a disaster situation
- D. A Failover Plan is permanent recovery solution that doesn't need to be finalized

Correct Answer: AC

QUESTION 12

A backup administrator decided to move the Veeam Backup and Replication server and configuration database to new servers. Which configuration restore mode should be used?

- A. Migrate
- B. Planned failover
- C. Restore
- D. Failover plan

Correct Answer: A

https://helpcenter.veeam.com/docs/backup/vsphere/vbr_config_migrate.html?ver=120#step5

QUESTION 13

A Backup Administrator needs to create a fully functional VM at a secondary location in an isolated network, and the VM should not require manual editing or modifications to the configuration. Which of the following jobs could the Backup Administrator use? (choose the 2 appropriate options)

- A. Backup Job
- B. VM Copy Job
- C. Replication Job
- D. SureBackup Job
- E. Configuration Backup Job

Correct Answer: BC

https://helpcenter.veeam.com/docs/backup/vsphere/about_replication.html?ver=100

https://helpcenter.veeam.com/docs/backup/vsphere/vm_copy.html?ver=100

QUESTION 14

Which of the following predefined tests can be performed during a SureBackup verification test on a backup file? (Choose three.)

- A. Application test
- B. Heartbeat test
- C. Ping test
- D. SAN check
- E. Boot time
- F. OS test

Correct Answer: ABC

Reference: https://helpcenter.veeam.com/docs/backup/hyperv/surebackup_tests.html?ver=100

QUESTION 15

Sometimes snapshots are "lost" by vCenter. What tool finds and removes those lost snapshots?

- A. CLI Snapshot Removal Tool

- B. Snapshot Hunter
- C. Snapshot Extractor
- D. Veeam ONE Orphaned VM Reporter

Correct Answer: B
